

Project Design Phase-II

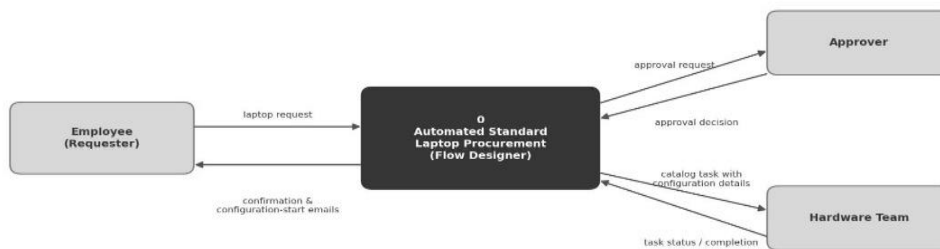

Data Flow Diagram & User Stories

Date	03 October 2026
Team ID	SWTID-2026-7089
Project Name	Streaming IT Procurement: Automating Standard Laptop Orders With Flow Designer
Maximum Marks	4 marks

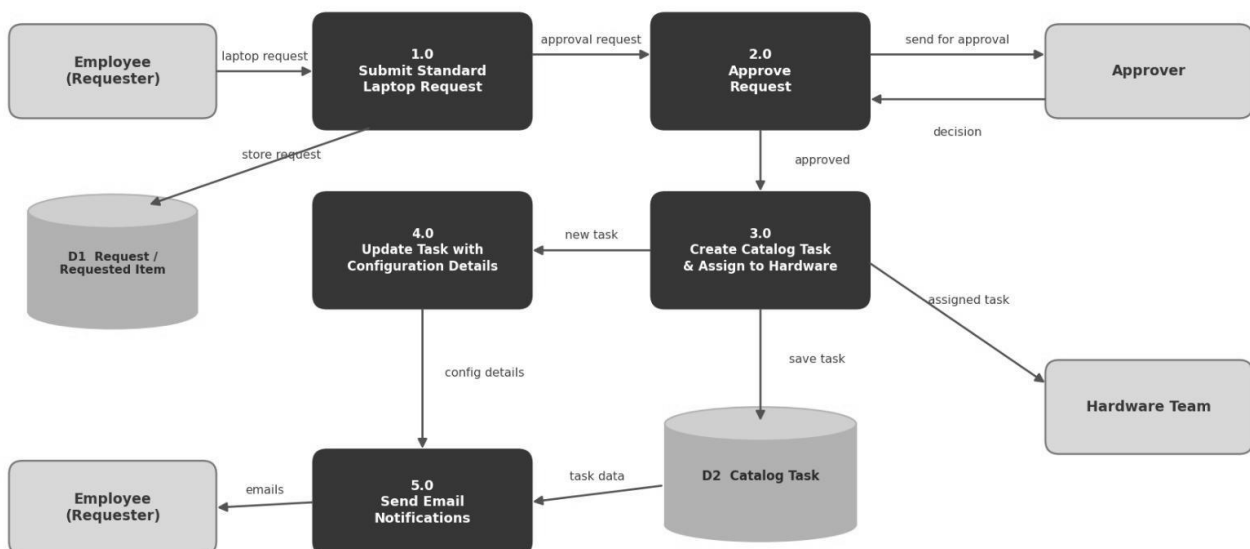

Data Flow Diagrams:

A Data Flow Diagram (DFD) shows how information flows within a system: how data enters and leaves it, what changes the information, and where data is stored. The diagrams below show the automated Standard Laptop procurement flow, first as a single process (Level 0) and then broken into its main processes (Level 1).

Level 0: Context Diagram

Level 1: Process Breakdown

User Stories

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Employee (Requester)	Standard Laptop Request	USN-1	As an employee, I can submit a Standard Laptop request from the Service Catalog.	A request number is generated and the request is visible to me	High	Sprint-1
		USN-2	As an employee, I receive an email confirming that my approved request is being processed.	Confirmation email is received after approval	High	Sprint-1
	Notifications	USN-3	As an employee, I am notified when the laptop configuration process begins.	Configuration-start email is received	Medium	Sprint-2
	Request Status	USN-4	As an employee, I can view the current status of my laptop request.	Request and task status are visible and kept up to date	Medium	Sprint-2
Approver	Approval	USN-5	As an approver, I receive the laptop request for approval and can approve or reject it.	Approval decision is recorded and the flow continues only when approved	High	Sprint-1
Hardware Team Member	Catalog Task Assignment	USN-6	As a Hardware team member, I get a Catalog Task assigned to my group automatically after approval.	Task is created and assigned to the Hardware group without manual action	High	Sprint-1
		USN-7	As a Hardware team member, I can see the laptop configuration details on the task.	Task contains the configuration details needed to prepare the laptop	High	Sprint-1
	Task Completion	USN-8	As a Hardware team member, I can update and close the task once the laptop is configured.	Task state changes to complete and the request status is updated	Medium	Sprint-2
Administrator (Flow owner)	Flow Management	USN-9	As an administrator, I can build, activate and test the laptop flow in Flow Designer.	Flow runs end to end for a test request	High	Sprint-1
		USN-10	As an administrator, I can review flow executions to find and fix failures.	Execution history shows each step and its result	Medium	Sprint-2
