

Project Design Phase -II
Solution Requirements(Functional & Non-functional)

Date	03 October 2026
Team ID	SWTID-2026-7089
Project Name	Streaming IT Procurement: Automating Standard Laptop Orders With Flow Designer
Maximum Marks	4 marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Standard Laptop Request	Employee submits the Standard Laptop item from the Service Catalog Request and requested item are created automatically on submission
FR-2	Request Approval	Approval is requested before any fulfillment work starts Flow continues only after the request is approved
FR-3	Catalog Task Creation	Catalog Task is created automatically once the request is approved Task is updated with the required laptop configuration details
FR-4	Hardware Team Assignment	Catalog Task is assigned automatically to the Hardware assignment group
FR-5	Requester Notification	Email confirming that the approved request is being processed Notification when laptop configuration starts
FR-6	Request Status Tracking	Requester can view the status of the request and its task Status is updated as the task moves through configuration and completion

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

NFR No.	Non-Functional Requirement	Description
NFR-1	Usability	The Standard Laptop item is simple to find and complete in the Service Catalog, and requesters receive clear emails without needing to contact IT for updates.
NFR-2	Security	Access is controlled through ServiceNow roles and ACLs, approval is mandatory before fulfillment, and all access is over HTTPS.
NFR-3	Reliability	The flow runs the same steps for every request (approval, task creation, assignment, notification) and run history is available in Flow Designer for checking failures.
NFR-4	Performance	Catalog Task creation, assignment and notifications happen automatically after approval, without waiting for manual action.
NFR-5	Availability	The solution runs on the ServiceNow cloud instance, so it is available whenever the instance is available.
NFR-6	Scalability	The flow is event-driven and reusable, so higher request volumes or additional laptop models can be supported without redesign.
