Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	5 Marks

Project Overview:

Project Name: Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Project Description: An automated enterprise IT procurement solution leveraging ServiceNow Flow Designer to digitize standard laptop ordering, dynamic multi-tier approval routing, real-time CMDB stock validation, vendor API integration for out-of-stock PO generation, and automated fulfillment asset tracking

Project Version: v1.0 (Release Candidate 1)

Testing Period: 25 October 2026 to 31 October 2026

Testing Scope:

Features and Functionalities to be Tested:

- Service Catalog laptop ordering portal and bundled accessory selection interface.
- Flow Designer workflow execution, manager approval routing, reminder timers, and auto-escalation triggers.
- CMDB inventory checking, automated asset reservation, and serial tag logging.
- External vendor REST API integration for automated Purchase Order (PO) creation upon stock out.
- Automated IT technician task generation (OS Imaging, Hardware Tagging, Dispatch).
- Automated multi-channel status communications (Email alerts and Portal order tracking).

User Stories / Requirements to be Tested:

- **USN-1 to USN-4:** Employee request submission, catalog selection, accessory bundling, and pre-order price preview.
- **USN-5 to USN-8:** Line manager approval assignment, one-click email/portal approval, escalation timers, and reminder notifications.
- **USN-9 to USN-11:** Real-time stock validation in CMDB, vendor PO API invocation, and asset tag logging.
- **USN-12 to USN-14:** Automated IT task routing, shipping tracking updates, and IT lead-time reporting dashboard.

Testing Environment:**URL/Location:**

<https://dev-it-procurement.service-now.com/uat>

Credentials (if required):

- **Employee Role:** [uat_emp_01](#) / Password2026!
- **Line Manager Role:** [uat_mgr_01](#) / Password2026!
- **IT Admin Role:** [uat_admin_01](#) / Password2026!

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Submit Standard Laptop Request	1. Log in as Employee (uat_emp_01). 2. Navigate to IT Service Catalog > Laptops. 3. Select "Developer Tier Laptop" with Docking Station. 4. Click Submit.	Request submitted successfully; Request Item ID (RITM) generated and visible in portal dashboard.	RITM100204 generated; request visible on employee portal dashboard.	Pass
TC-002	Manager Approval Routing	1. Submit request as Employee. 2. Log in as Line Manager (uat_mgr_01).	Request status updates to "Approved"; Flow Designer advance	Request approved; workflow state updated immediately to	Pass

		3. Open pending approval task. 4. Click "Approve".	s workflow to inventory validation step.	CMDB stock check.	
TC-003	Approval Auto-Escalation Timer	1. Submit request requiring approval. 2. Leave request unapproved for 24 hours (simulated). 3. Advance timer to 48 hours in test environment.	Reminder email triggered at 24 hours; approval task auto-escalated to Department Head at 48 hours.	Email reminder delivered at 24h mark; task successfully escalated to Dept Head at 48h.	Pass
TC-004	CMDB Stock Reservation (In Stock)	1. Approve laptop request for a tier with available CMDB inventory. 2. Verify CMDB inventory table.	Flow Designer reserves 1 unit in CMDB; serial number and asset tag bound to RITM record.	1 unit deducted from available stock; Asset Tag AST-9023 linked to RITM.	Pass
TC-005	Vendor PO Trigger (Out of Stock)	1. Approve request for a laptop tier with zero CMDB stock. 2. Inspect outgoing API logs and vendor endpoint response.	Flow Designer triggers REST API call to vendor portal; Purchase Order ID returned and logged	REST API call executed ; Vendor Purchase Order #PO-88392 attached to request record.	Pass

			on request.		
TC-006	Automated IT Task Generation	1. Confirm stock allocation or PO creation. 2. Open IT Fulfillment Task Queue.	Three sub-tasks automatically created: 1. OS Imaging, 2. Asset Tagging, 3. Packaging & Shipping .	All 3 sub-tasks generated and assigned to IT Operations group.	Pass

Bug Tracking:

Bug ID	Summary	Severity	Related Test Case	Status	Resolution / Action
BUG-001	Approval reminder email sent twice at the 24-hour mark.	Medium	TC-003	Closed	Corrected duplicate event queue trigger condition in Flow Designer logic.
BUG-002	Serial number field truncated in CMDB asset reservatio	High	TC-004	Closed	Updated string length field mapping limit on CMDB

	n payload.				REST payload.	s
BUG-003	Tracking link redirect throwing 404 error on employee portal.	Low	TC-007	Closed	Fixed portal notification template URL script to use secure HTTPS redirect format.
